SUMMARY

A highly professional and reliable BSc Graduate with a strong background in technical troubleshooting and customer-facing roles. Proven ability to explain complex information clearly through experience as a University Tutor. Committed to providing excellent service, maintaining high levels of accuracy in administrative tasks, and resolving technical issues in a fast-paced office environment

EDUCATION

Bachelor of Science, Electrical and Computer Engineering

University of Cape Town, Cape Town

Feb 2019 – June 2025

Completed an NQF Level 8 degree with a strong emphasis on project-based learning in software development, electronics, and communication systems. Final year thesis involved designing a 5G/Wi-Fi coexistence strategy and validating its performance using a custom-built Python simulator.

Master of Science (Candidate), Electrical Engineering

University of Cape Town, Cape Town

2026

EXPERIENCE

Vacation Work: Engineering Intern

Mamoshe Investment Group (Pty) Ltd, Polokwane

Aug 2025 – Sep 2025

- Provided "on-floor" support for the Waterberg TVET College CCTV Installation project, assisting Project Engineers with physical layer implementation. Ensured tasks adhered to technical standards (T568B, IEEE 802.3at PoE+), contributing to zero post-installation connectivity issues. Assisted with organizing and documenting project tasks, including network configuration and system testing.

Tutor

University of Cape Town, Cape Town

Aug 2024 – Nov 2024

- Successfully tutored a cohort of engineering students in EEE3097S (Engineering Design), improving their understanding of complex design principles. Led practical lab sessions, providing hands-on assistance and debugging support, and was responsible for marking assignments and providing detailed, constructive feedback.

Vacation Work Training

Cape Peninsula University of Technology, Cape Town

Dec 2021

- Completed an intensive two-week, hands-on training program in a workshop environment. Gained practical experience and a sound working knowledge of mechanical, pneumatic, and hydraulics processes. Developed foundational skills in welding, fitting, turning, metrology, and robotics

SKILLS

Professional Skills:	Strong Written & Verbal Communication, Teamwork & Collaboration, Excellent Organizational Skills, Attention to Detail.
Languages:	English (Proficient), Shona (Native)
Analytical Skills:	System Modeling & Simulation, Data Analysis & Interpretation, Root Cause Analysis, Critical & Creative Thinking.
Software & Tools:	AutoCAD, MS Office (Word, Excel, PowerPoint), Python, MATLAB, SolidWorks (3D Modeling), Git.
Technical Skills:	Electrical System Design Principles, Power Distribution Concepts, Network Configuration (VLANs), Control Systems Fundamentals, Structured Cabling, Basic Welding & Hand Skills.
